Mountain View, CA | joshuanee@cmu.edu | [linkedin.com/in/joshua-nee](https://www.linkedin.com/in/joshua-nee) | <https://joshuanee.vercel.app> | (914) 912-3173

EDUCATION

Carnegie Mellon University

August 2025 – December 2026

Master of Science (M.S.) in Software Engineering

- QPA: 4.0 / 4.0
- Research Assistant: Distributed Systems; Teaching Assistant: Computer Systems, Deep Learning

National University of Singapore

August 2021 – January 2025

Bachelor of Engineering (B.Eng.) in Computer Engineering

- GPA: 3.9 / 4.0, Top 5% of Academic Year 2023/2024 Sem 2 & Academic Year 2024/2025 Sem 1 (Deans' List)
- Teaching Assistant: Data Structures & Algorithms, Software Engineering & OOP, Machine Learning

PROFESSIONAL EXPERIENCE

DoorDash

May 2026 – August 2026

Software Engineering Intern

Sunnyvale, CA

- Owned DashPass' first game backend (gRPC, SDUI, Cassandra, Redis), supporting **8M+ weekly impressions**
- Pioneered migration off the legacy stack and established the architecture **adopted by all future games**
- Engineered AI code generation that **cut backend effort by 85%**, enabling new contributors to ship independently

Shopee

January 2025 – July 2025

Backend Software Engineer

Singapore

- Developed cross-border e-commerce and payment system with Kafka/MySQL, processing **10M+ daily transactions**
- Replatformed Golang microservices onto internal library management, **cutting fragmented dependencies by 90%**
- Restored notification microservice deployability for **100+ internal users in 2 weeks** via release workflow redesign
- Spearheaded nationwide updates to request routing and access control systems, supporting 100K+ user requests
- Commenced role after early graduation; concluded tenure upon Master's program admission

ST Engineering

May 2024 – August 2024

Software Engineering Intern

Singapore

- Designed 3D interactions and live geo-tracking in Swift by **reverse-engineering** undocumented VisionOS behaviors
- Architected reusable mixed reality components, reducing future integration time by 30%
- Prototyped Apple Vision Pro applications **within 3 months** of US launch, preceding Singapore release by 2 months

InTune Auto

December 2022 – December 2023

Full-Stack Software Engineer

New York, NY

- **Reduced data retrieval latency by 80%** by redesigning pagination and query architecture
- Innovated custom scheduling platform to improve enterprise booking efficiency with advanced availability logic
- Gathered and defined client requirements to ship features weekly, maintaining 99% customer retention
- Collaborated in a 4-engineer startup team using React, Java, and PostgreSQL following Scrumban methodology
- Drove strategic acquisition by Highland Creek Partners through full-stack engineering enabling **2x user growth**

PROJECTS & HACKATHONS

A New Agent Hackathon | LLM Agents

October 2025 – October 2025

- Won Vapi Track (200+ builders) for a tool-using LLM scheduling agent with multimodal (text + voice) dialogue
- Integrated ClinicalTrials.gov-grounded dialogues with Google Calendar and Supabase Edge for intelligent timetabling

Computer Engineering Capstone Project | Machine Learning

August 2024 – November 2024

- Built real-time gesture recognition system using multi-layer perceptron in TensorFlow, achieving **>95% accuracy**
- Devised feature extraction pipeline using statistical and spectral metrics optimized with SHAP analysis
- Enhanced model robustness via time-series data augmentation and hyperband-based hyperparameter tuning

TECHNICAL SKILLS

Languages & Frameworks: Python, Go, Java, TypeScript, C++, Bash, React, Next.js, gRPC/REST, Protobuf

Databases & Communications: PostgreSQL, MySQL, MongoDB, Firebase, Redis, WebSocket, MQTT, Apache Kafka

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, NGINX, Grafana, Prometheus

AI/LLM: TensorFlow, PyTorch, LangChain, LangGraph, MCP, Agentic AI, RAG pipelines

Developer Tools & Productivity: GitLab CI/CD, GitHub Actions, Linux, OpenCode, Claude Code, Codex
